## IMAGERY INFORMATION REPORT

NAN-B AIRCRAFT ACTIVITY, CHINA (S)

(S/WNINTEL) Three NAN-B aircraft were observed at Nan-Chang Airframe and Missile Plant 320, China, [REDACTED] The NAN-B is an indigenously designed, small, single-engine, swept-wing, jet aircraft. The role of this aircraft is not certain, but it could probably be used either as a ground support fighter or as a jet trainer. This was the first sighting of more than one NAN-B aircraft, which increases the probability that the NAN-B may enter into series production in the future.

25X1

(TSR) The NAN-B has been seen only at this plant. The aircraft was first observed in May 1975 and has been seen only twice since then.

(S/WNINTEL) An A-37 (DRAGONFLY) aircraft was also observed for the first time on the ramp of this flyaway field.
